

# THE GLEICHEN CALL

VOLUME XXIX NO. 46

GLEICHEN, ALBERTA, WEDNESDAY

JANUARY 27, 1937

SUBSCRIPTION \$2.00 PER YEAR

## SNOW STORMS BLOCK MANY ROADS IN THE COUNTRY

Automobile traffic into Gleichen is almost at a standstill owing to snow drifts of miles. About 4 o'clock Saturday afternoon a blizzard sprung up and lasted most of the night. Many cars going to the country became stuck in the drifting snow. Gleichen curlers who went to Cluny to curl left their cars there and returned home by train. Other curlers starting for the same place after the wind came up turned round and came home rather than take a chance of getting stuck on the road. There were reports of numerous cars being stuck between here and Bassano. Early Tuesday morning another blizzard came up and lasted all day. This storm was much worse than Saturday's. Some cars tried to navigate around town; even with chains on got stuck and had to be pulled out. The blizzard Tuesday was much more miserable than Saturday owing to the below zero weather.

## THE WORLD OF WHEAT

By H. G. L. Strange Director of "Crop Testing Plan."

Canadian wheat in the long run is not paid for in money, but by the goods, commodities and services of foreign people.

Whenever, therefore, the flow of goods and products out of foreign countries declines, we may be quite sure that a corresponding decline will take place in the flow of Canadian and other wheats into those countries.

The League of Nations tells us that the export of goods and commodities from wheat importing countries has declined during the depression years by about 30 per cent. The sale of wheat from Canada and other wheat exporting countries has also decreased by approximately 30 per cent. This, of course, is just what might be expected.

If is evident, therefore, that as the wheat importing countries of the world are able to buy more of their own goods, commodities and services, they will be able to purchase more Canadian and other exports.

It can be said, then, finally, that the welfare of the farmers of Western Canada depends very much on the willingness of the nations of the world to buy each other's goods. Canada, of course, must do her full share of this buying from others. She is to increase her sales of wheat.

The following factors have tended to raise prices:

Extraordinary bidding for Australian and Canadian wheat that is in store in Europe; countries apparently stocking up for possible war. Drought threatening Chinese wheat crop. Japan and Australia sign trade agreement. Mild, rainy season in France causes seed growth and vermin.

The following factors have tended to lower prices:

Harvesting completed in Australia. Clear weather facilitates movement of Argentine small grains; corn conditions favorable. Indian wheat and flax seed crop conditions favorable. Larger plantings of winter vegetables in Cuba, Mexico and Puerto Rico. Larger exports of fresh pears from the U.S.

## HOCKEY

Friday evening the Calgary Radics played their second game here this winter before a crowd of about 400 onlookers. The game ended in a 2-2 tie. This was the speediest exhibition of hockey played here so far this season; both teams setting up a terrific pace. The pace told on the Gunners in the middle of the last frame when they displayed signs of weariness; not so the much younger Radics youth being in their favor. There was very little heavy checking and no penalties were handed out by Referees McKay and James.

There was no scoring in the first. Play was as much one way as the other. The local boys had more scoring chances, frequently shooting wide. Five shots were sent out of the Gleichen net, while the Radics net guard picked out 7. The second period saw

## ALTERATIONS IN HALL MAKE BIG IMPROVEMENT

For several weeks past carpenters have been busy in the Community Hall making alterations and improving the looks of the interior. The ceiling of the hall has been lowered by pumping out the corners rounded. This makes a great change in the looks of the place and the box like effect is gone. The old projection room has disappeared and a new one built in the club room, the floor of which was lowered three or four feet to do this. In order to conform with the regulations regarding projection rooms this room has coves, floors, ceiling and sides, making the hall almost fire proof as far as the projection room is concerned. The removal of the old overhanging projection room and the new ceiling has greatly improved the sound-making the talking pictures more clearly and easily heard. It is now possible to properly heat the place. Before the improvements it took a lot of coal and much firing to keep the hall comfortable in frigid weather. The work has been in charge of Chas. Thompson.

The Calgary goalies again stop seven shots while Wilson kicked out four. At no time did the situation become critical for the goalies, the defence always stayed off all puck carriers. Yet, the goalies had to be on the alert since the shots taken in their direction were bullet drives. There was a time for a few minutes when it appeared that a goal might be made by either side when both teams put on power play.

Demonstrating the increased interest in the A.M.A., the membership reports for January show material gains over the similar period of last year.

## MOTOR CLUBS ADOPT A NEW ROUTING PLAN

Motorists in all parts of the province will welcome the new system of touring routes adopted at the Eastern section meeting of the Alberta Motor Association and which will also be available a divisional headquarters at Calgary and Lethbridge.

J. J. McNell, secretary of the A.M.A. has been in communication with the headquarters of the American Automobile Association and other centers in the United States concerning the latest system in routing summer tourists. As a result a great deal of data has been obtained by Mr. Neil, who has consolidated it for the benefit of Alberta motorists.

Thus, when an application has been received for a routing to any part of the United States or Canada, the A.M.A. office will be able to furnish much more additional information than has been the case in the past. The motorist will be supplied with an amazing amount of detail concerning any favored route, besides much valuable material that will deal with the return trip.

During the past year, the motor touring services operated by the A.M.A. showed increased popularity as holiday makers were routed in large numbers to all sections of the Dominion and south of the international border.

From the files of GLEICHEN CALL TWENTY YEARS AGO

N. E. Thorsen was elected trustee for the Hammer Hill school in place of Mr. Scott who resigned.

At 4 o'clock Thursday night, with a blizzard blowing fire broke out in A. Jensen's residence. The fire brigade was called and the blaze extinguished. Mr. Jensen states he could have extinguished the blaze with two or three pails of water but he could not pump it fast enough. The chemical engines were slow in arriving and the hose soon discouraging, and when it did arrive wrenches were missing, making it necessary to run out the whole reel. When the brigade got started they worked hard and saved the building. The loss will be a few hundred dollars. Evidently with a little practice the new brigade will prove excellent.

A proposition is underway in England to amalgamate the Southern Alberta Land Co. and the Canadian Wheatland Ltd., and to raise capital to complete the great irrigation project south of Gleichen on which over five million dollars have already been expended.

Mr. and Mrs. J. E. Ostrand and little Pat Irvine have returned from an extended visit with relatives in Toronto.

Pete Billy Service returned over a week ago from Calgary, and is still on crutches, owing to his shooting accident last fall.

W. McConnell has received word of his brothers has been wounded in Gordon Oliver; Darwin Miller; Junior Cup; Ronny Bishop.

Tom Custer, one of our wealthy Blackfoot Indians returned from Calgary very indignant and greatly disgusted with the police. It appears a merchant up there hung a coon-skin coat out to air in front of his store, valued at \$150, and some one took it. Soon the police were on the job, and as Tom was wearing a good coat they took him in, claiming he stole the coat. Tom cannot talk English very well, but he finally produced a receipt for \$455.55 from J. A. Ramsey and made the police understand the coat was not his and that he picked it up on the street. Tom could hardly stand for such an insult as was a Christian and very honest. A letter to the police from Mr. Ramsey and Tom was

## REPORT OF LAST MEETING OF TOWN COUNCIL

The town councilors recently held a couple of meetings.

The council decided that the time had come for the Athlete Club to tear down its present shed and use the lumber for a roof on the rink, had expected, therefore, the secretary was instructed to notify the club that the town intended to wreck the building and use the material for town purposes.

Mrs. M. A. Brown waited on the council in connection with the sewer on her property. She advised the councilors that she thought they were responsible for the sewer and asked them to re-consider this matter. As this sewer had been connected in 1916 and no account had been rendered to the town for the cost of the same, the secretary was instructed to ask Mrs. Brown submit an account for the cost of installing the sewer when the matter would be given further consideration.

A fan is to be put in the furnace of the Community Hall and the town handy man was instructed to have master attended to.

The secretary was instructed to prepare a list of taxes owing by the Municipality of Blackfoot for the school district. This is to be brought up at the next meeting. There was some discussion of erecting a stage in the Community Hall but the matter will be held in abeyance for the time being.

## THE BUSINESS OF BEING A DOG

By a Local Dog Fancier.

The life of a dog, even the most fortunate is not all downy pillows and juicy ones. The life of every dog is filled with responsibilities which he realizes to the utmost, but never shirks, even though the path of duty leads to the grave. And when a dog dies, he takes with him that which humans seldom bear away—his life.

Nevertheless, life holds for him both afflictions and companionship of his human friends, his moments of frolic. Every dog has a sense of humor, frequently developed to a remarkable degree. He likes a joke as well as any one, and how well he knows when the joke is on himself, and how good humoredly he accepts it!

Many persons seem unable to realize that a dog has any business on earth except as guardian of life and property, and playmate for children. To be sure, he fulfills these duties perfectly, but the role in which the dog shines with a lustre which time cannot tarnish, nor custom dim, is that of friend, prince of comrades!

Of a dog's many duties and privilages, not the least important, by any means, is that of confident. No man bears his soul to a human as to his dog. It is the dog who hears the cry of the broken heart. It is the dog who crouches in mute sympathy as one pours out the bitterness of his soul in prayer to his Maker. It is the dog who stands at the trial stand face with its mask of pride and indifference cast aside. It is the dog who sees the pockets turned outward. It is the dog who truly keeps the vow, albeit unspoken, to "Love, honor and obey, and forsaking all others, cleave to me, and only one, until death."

When a man calls to remember the loves of his life, there is one face seen through a mist of tears. With friends it is the same, there is one friendship more perfect, more enduring. And so with our canine friends, no matter how many dogs one has owned and loved, there is one whose memory is greener, thoughts of whom bring always a smile and a sigh.

It may be truthfully said that a dog is a success in any role he assumes. He is a thespian of no mean ability. And with what becoming modesty he wears his laurels! In short every day, every hour, the dog carries on tirelessly, uncomplainingly, without a murmur or thought of reward. Man's indebtedness to the dog is too overwhelming to be summed up in dollars and cents. Yet how little it costs to repay him. Food, kindness, shelter, these simple things, constitute his hearts desire. So easy to give, yet so rarely bestowed.

But, after all, the chief business of a

## Inescapable Obligations

Responsibility to others is an obligation which none can evade or escape, and the extent to which a man is mindful of this obligation and heeds it will tell his progress and success in life measured.

The statement is axiomatic whether the subject is an employee or employer, whether he conducts his own business from an office or store or whether he is working for himself on the land. There are many who think they can escape direction and avoid responsibility to others by going into business for themselves or by taking up land because they think it offers "independence".

In the industrial world one meets young fellows who seem to think that the only fruit from their labors is what the Boss gets. Either they do not know or do not care about the self-development that comes from tackling problems even where there is no immediate difference to their own pockets.

They cannot see that in performing their daily tasks they are working for the kind of business men they will be in the future. They are working for themselves, making their own careers, and being paid for it by another man or men. But so long as they remain in the wrong state of mind they will likely remain in the same station of life. Business to them will be something that is done by someone else. If they are ever in business for themselves it will be without the training that would ensure success.

Some of them do go into business. A few succeed out of sheer necessity. Some succeed for a time and particularly in times of prosperity but most of them fall in the long run because they have not accepted responsibility and have gone into business without the self-imposed training necessary to ensure success in any line. In other words they have not learned to master themselves.

Just how much is any man in business his own boss? The grocer, the bond dealer and insurance man each knows that the customer is the boss. When the employee starts out in business for himself he may learn it was easier to satisfy one employer than a hundred. He will learn that the job he has undertaken is the boss and that every job, every day, is and will be. And he will get his "pay" according to how well he pleases his "employers".

And what is true in the industrial world is equally true for the man on the land. He who thinks he is escaping responsibility to fellow men by taking up land and wheat or beef is making the same mistake as the man who goes into business for himself in the hope of pleasing himself and ignoring his own dictates.

The farmer has many bosses and most of them are existing in their demands. The consumer who eats the bread made from the wheat grown on his farm and the family who consume the farmer's meat are his bosses, even though the farmer may not come into direct contact with them, and his income will be determined by the extent of his ability to cater to their palates. When the farmer's wheat or beef is graded and priced at the elevator or the abattoir, the grade and the price are based on his ability to please his unseen bosses. They determine the bulkiness of his pay envelope.

And for the farmer the unseen consumer is not the only boss. There is another to whom he must look for direction and guidance and that is Dame Nature herself, perhaps the most exacting of them all. To ensure measurable success the agriculturist must not only please the thousands of more or less remote consumers whom he supplies but he must bow to the rulings of Nature as represented in her seasonal manifestations.

To be successful the man on the land has to learn to work with Nature. An attitude of antagonism or even supineness towards her laws will only create trouble for himself. He must learn to do things at the right time and in the right way whether inclination leads in that direction or not. In other words he must be master of himself.

So there is no use trying "business for oneself", either in the office or the store or on the farm as an escape from responsibility. A man's problem is only beginning when he steps out for himself. More than ever before he will need the experience he has gained in serving others, and in the case of the farmer it must necessarily be in the training he has acquired from his father on his neighbor and from his own observations and deductions. Lucky for him if he has balanced that experience by learning the fundamentals of management and finance as well as production.

Capital alone will not ensure success for, as one authority said, "it is not so much what capital a man has as what he does with it."

It will take character and determination. Morale. The invisible assets that went into the founding of every business that ever became anything more than a mere way of making a living.

Without them a man weakens under the strain of satisfying every large and exacting clientele clamoring for every kind of efficiency in his product. To satisfy these legitimate demands means success. Any other course means failure.

### May Receive Fortune

**Stone Cutter In France May Be Helped**

**To Fortune In America**

The six-year search for the legal heirs of the \$20,000,000 tobacco fortune of the late Mrs. Henrietta E. Garret, widow of Walter Garret, of Philadelphia, was believed near an end with the discovery in Nancy, France, of a stonecutter named Murys, who is a fourth cousin. He is about 60. His life is living, and they have a 25-year-old son.

When informed the family might receive a large part of the Garret fortune, Garret's lawyer, at \$20,000,000 francs (\$24,800,000) with accumulated earnings, Mme. Murys said in that case they would devote most of it to alleviating distress.

M. Murys declared he would not leave his job as stonecutter as he still enjoys the work.

There are 64 streets, squares, etc., in London named "Albert" in honor of Queen Victoria's husband.

### Alberta Scholarships

**Established To Encourage Agricultural Education Among Farm Boys And Girls**

Established to encourage agricultural education among farm boys and girls, 26 scholarships will be available to young people in Alberta. Hon. W. N. Chant, minister of agriculture, announced.

The scholarships, entitling winners to attend one of the provincial agricultural schools, or the agricultural university of the University of Alberta, will be financed by surplus funds obtained from the defunct Canada wheat board.

The Bible has been reprinted more than any other book. Each of the early printers inaugurated his career by running off a few copies of the Bible, as if to insure success in his future publications.

Speaking without thinking is like shooting without aiming.

### Food Prices Rising

Rising Food Prices Are Hard On The Consumer

The problem of the family budget is again disturbing the peace of mind of the thrifty Canadian housewife and her husband who has to provide the wherewithal to meet the needs of the family. The centre of attention is food prices.

After a spell of fairly stable prices, the movement for some time has been upward and the cost of a budget of the leading foods that are consumed by the Canadian has risen about six per cent. in the past six months. This figure represents the average for 70 Canadian cities, and would be higher in some and lower in others.

The sharpest price advances have been made for potatoes, eggs, butter, flour, bacon and fresh pork. Of course, eggs and butter are usually higher in the fall but other increases are not to be explained by seasonal influences. Most of the other common foods have also moved upward by moderate amounts, the only noteworthy exceptions being fresh beef, lamb, milk, coffee and sugar.

Food prices generally are now almost 25 per cent. higher than the 1933 depression low point but are still 25 per cent. below the pre-depression levels of 1929.

Rising food prices are a hardship on the consumer but are a boon to the producer. The farmer was hard hit in the depression and a distressed farming community reacts on the prosperity of all other classes in the Economy. Prosperity of farmers would lead to more general prosperity and higher incomes to most of the higher costs of living. So even though the cost of higher food costs which hangs over us may have a silver lining.—From the Internal Trade Branch of the Dominion Bureau of Statistics, Department of Trade and Commerce.

### Japan Short Of Oil

Has Plan For Production Of 1,500,000 Tons From Coal

The Japanese arms and navy have come forward with plans calling for the creation of a \$30,000,000 company to produce 1,500,000 tons of oil a year from coal during the next five years.

The coal from which this oil is to be squeezed is expected to be obtained from mines in Japan and territories under Japanese influence or control.

While it produces both oil and coal, Japan proper does not possess either of these minerals in sufficient quantity or of such quality as to meet its actual or potential needs in peace or war.

And that is why it was anxious to secure in Manchuria a dependable supply of coal and oil-bearing shale.

The economic interpretation of history finds strong support in the efforts of underprivileged Japan to make itself economically independent of other powers which might try to starve it into submission.

At the same time Japan's desperate efforts to make itself economically independent reveal the disadvantage under which it would now enter upon a prolonged war with the Soviet Union, say, which still has under its top-soil incalculable stores of coal, oil and other essential minerals.—Detroit Free Press.

### Would Protect Canada

**Lethbridge Member Will Support Any Program For Increased Defense**

John H. Blackmore, of Lethbridge, Social Credit leader in the House of Commons, said that he would strongly support the King government in any program of enlarged defense.

"Canada in my opinion should be spending as much per capita on defense as Great Britain and the United States," he said. "This Dominion is jointly responsible with all parts of the British Commonwealth for its defense and we are jointly responsible with the United States for the protection of the North American continent."

Mr. Blackmore said air defense is the important feature Canada should emphasize.

### Were Well Trained

A commercial traveller, visiting a large business office, jokingly boasted to the manager that he could pick out all the married men among the employees. He was challenged, and so proceeded to demonstrate.

He stationed himself at the door as the employees returned from the noon luncheon hour, and designated those whom he believed to be married. In almost every instance he proved to be right.

"How do you know?" asked the manager in amazement, after the experiment.

The answer was simple. "The married men wipe their shoes on the mat; the single men don't."

### WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to Go

The liver should pour out two pounds of bile into your bowel. Your food doesn't digest. It just decays in the bowel. Gas builds up and you feel uncomfortable. Your poisons go into the body, and you feel sour.

A more bowel movement doesn't always get at the cause. You need something that will move the bowels. Take a spoonful of Carter's Little Liver Pill to get these two poisons out of the body. It will "clean up and up". Harmless and gentle, they move the bowels and remove the poisons of caloric but have no caloric or mercury in them. Stimulates the liver. It is a tonic. Stimulates the liver. It is a tonic.

## Thou Shalt Not Love

A NOVEL BY —  
GEORGIA CRAIG

CHAPTER XIV.—Continued

She knew Sapphira must have more powders in the extra luggage the colored woman had brought along. Feverishly she hunted for them, tossing lovely lingerie, expensive vials, boxes, every which way, here and there. At last she found the box she recognized. It was filled with little packages. She moved across the floor with them to the table on which the glass of water was all ready for her. With shaking fingers she began opening the little packages, one after the other, counting—one, two, three, four . . . She emptied them all into the glass. A strange excitement possessed her. She must hurry now, before someone came to stop her!

The liquid foamed right to the top of the glass, a life-giving looking sort of liquid which was a lie—which meant death in its foolish imitation of life's effervescence. Starr picked up the glass.

With a gesture of bravado, she held it up in a toast, in just the same way that "Play-Girl" had tilted her champagne glass to meet the laughing, adoring face of some man.

Starr's toast, the toast she thought would be her last, was to the pale, wild-eyed woman who faced her in the mirror.

But even as the glass touched her lips, her plan was rudely frustrated. There was a sudden noise behind her. A man's hand stretched out and knocked the glass from her fingers. The white liquid, not through its effervescence, foamed against the beige rug of one of Stephanie Dale's guest rooms.

Too late! Her fear had not been imaginary. Again Fate was laughing at her. Her hurry had not been sufficient . . .

The blurred figure beside hers in the mirror took definite shape. Starr choked out a sharp cry, swinging around.

"Michael!"

## To Alkalize Acid Indigestion Away Fast

People Everywhere Are Adopting This Remarkable "Phillips'" Way

The way to gain almost incredibly quick relief from stomach condition arising from overeating, is to alkalize the stomach quickly with Phillips' Milk of Magnesia Tablets.

You take either two teaspoons of the liquid Phillips' Milk of Magnesia; or two Phillips' Milk of Magnesia Tablets. You'll get instant relief from acid-headaches—from over-indulgence in food or smoking—and nausea are relieved. You can make over four cups have stomach

trouble.

This Phillips' way if you have any acid stomach upset, Get either the liquid alkaline or the remarkable Phillips' Milk of Magnesia Tablets. Only 23¢ for a big box of tablets at drug stores.

ALSO IN TABLET FORM:  
Each tiny tablet is the equivalent of a teaspoonful of liquid Phillips' Milk of Magnesia.

PHILLIPS' MILK OF MAGNESIA

He said sharply: "You won't need a sensitive tonight!"

He did not understand, of course, just what he had interrupted. He had never understood Starr from the beginning. He never would.

He looked very big and masterful, and altogether too much of any woman's idea of a man as he stood there, not far behind Starr, framed in the open doorway to the terrace. His gray eyes were glowing with strange fire that was not of this modern generation at all—but to Starr quite recognizable as the fire that night, had glowed in the eyes of any strange sheik of Arabia, Medina—yes—tremendously bright so.

His hard young mouth curved recklessly. The sleek lines of his wavy hair which he always sought to impress had broken into little ruffled waves, wet and unruly.

Starr did not know how she found her voice. It was a strange, muffled voice that asked:

"What are you doing here, Michael? What do you want?"

He gave a short laugh. "What should I want in a lovely, dangerous woman's boudoir at midnight . . . The answer ought to be obvious."

Daggers of ice pricked Starr's heart. Here was a situation which was entirely foreign to her. One with which she did not know how to cope, for the simple reason that it was completely out of the scheme of all her experiences. She met it upstanding.

"We haven't anything to say to each other," Michael-Hassan," she said coolly, deliberately using the nickname which would presuppose the lack of interest.

His lip curled. "Haven't we, Starr?"

He was moving closer. He was overwhelmingly close, boring her through those relentless gray eyes of his. He said, as smoothly as though they were discussing the next day's program:

"On the contrary, my dear, I think we have a lot to say to each other. We've been fooling ourselves, you and I, playing a game of bluff. But I've seen through it. And you ought to know you can't trifl with emotions which are stronger than men. You didn't really think that things could end like this, did you?"

The grim determination of his face added double significance to his words. Starr took a swishing backward step away from him. Her thin, frail hand was held against her lips in terror. She breathed:

"Michael, have you gone crazy?"

That strange laugh echoed again. Michael threw back his head to give freedom to it.

"Crazy? Yes! Sure I'm crazy. I'm crazy about you—as mad as a June hater. I hate you, and yet I can't keep away from you. Riddle me that, will you? You—you're a devil from the burning sands, a real eagle of the desert, if the truths were known, and you've bewitched me! You're poison, but I love you! You're poison in my blood!"

Starr cried out wildly, keeping her eyes as repressed as emotion would allow.

"Michael! You're insane! You mustn't say such things! Here in Stephanie Dale's home, and you're going to marry her!"

"I'm not going to marry Stephanie Dale," Michael contradicted grimly. "I hope I'm not that stripe of cad. It wouldn't be fair to her, with your shadow between her and me—which it would be—always! I'll always be branded as the sort of cad they do know about by everybody who knows me of course. I'm expecting that. I'm prepared for it. It doesn't matter in the slightest . . . Nothing matters, except that I want you!"

Step by step he came forward. Straight into the tortured pools of her long black eyes he looked, her mysterious eyes. This time he was too blinded by his own passion to see the reflection of her suffering that was mirrored starkly. He hung at her: "If you want to play, I'll play with you. You are going to marry me now, tonight! Oh, it'll all be the way you like it—all play! I'll jazz up the wedding march, burlesque the marriage vows—make a playground of marriage! We'll play—and how!"

Murder! That one incredulous word stuck in Starr's throat.

On this was all preposterous! It was all more like a nightmare dream than anything she had known since the day she shivered beside a dampness-oozing wall, and saw a three-thousand-year-old priestess shiver to dust, and heard . . . She would not think it!

Michael was joking, of course. He must have had more to drink than she had thought, and this was his idea of a swell aftermath to a party, and a getting even.

She was wrong. She saw that on the instant of seeing Michael's face plainly in her dim boudoir light. He meant what he said. He had never been more deadly in earnest. The de-

finest set of his firm, lean jaw spoke of a ruthless purpose.

Starr felt torn inside from the force of her own conflicting thoughts and emotions. There was the part of her that wanted Michael more than she wanted anything else in earth or heaven, even in spite of the caveman way he would take her—perhaps because of her. She was not aware. On the other hand there was the deep voice of conscience, warning her that she had not the right to marry any man, not even Michael. Oh, most particularly Michael! Her sacrifice to that ideal had already been placed on the altar.

And in the distance . . . There was a throbbing like the beat of tom-toms in her veins, like the rhythm of the drums of stretched goatskins heard in the desert, never forgotten.

Primitive passions, fighting for freedom. Passions the most effete civilization could never down.

Starr waged her silent battle, the lights flickering before her like tantalizing pinpoints of beckoning temptation. Then—it was through frozen lips that she retorted:

"You're completely raving crazy, Michael. Fairbourne! I wouldn't marry you if you were the last man on earth. Why should I?"

"Of course I don't expect you to settle down and raise babies. I know better than that—now. Ours will be a play marriage, like all the rest of your playing, except that it will be real, as far as you are concerned. Our play-marriage will end tonight. Tomorrow I'm going away—I don't know where. It doesn't matter. The wedding ceremony will be a memory between us . . . To me it will be a safeguard to insure me from ever making a fool of myself over a woman again."

Starr shrank away from her breath seemed driven out of her body as her eyes closed to shut out the pain. Everything else had been offered her—and now this! Play-girl hide for a night to satisfy a man's bitter desire for revenge! Was she to suffer this final humiliation before her fatal star burned out?

A desperate silence walled them in. He was waiting for her to speak. A desperate thought was milling around in her brain. Suppose somebody came—found them? Stephane . . .

Somehow she must get Michael out of this room. Perhaps outside she could reason with him.

The seriousness that had tensed her words before changed to lightness.

She glanced down at the flimsy, thin white silken nightgown and the gauze edges that veiled it. She smiled faintly, and when she spoke, she seemed to give in.

"All right, Michael-Hassan," she said with a rippling subdued laugh. "Have it your own way. You always do. Only give me a chance to slip into something in which I won't freeze to death . . ." She gave him a playful shove. "Go on and get your car, and don't make too much noise about it!"

(To Be Continued)

### Says Climate Changing

#### Hivers of Western Canada In Danger Of Drying Up

If the Rocky Mountain glaciers continue melting, in the opinion of Dan McCowan, western Canada's river will have dwindled "almost to nothing" in the next 500 years.

The glaciers which the Banff naturalist described as the "reservoirs" of the prairies, are decreasing slowly, McCowan told the Montreal Women's Club.

"The climate is changing in the Rockies," he said. "The glaciers are losing mass in the summer than they gain in the winter. If this continues, rivers like the Saskatchewan will have dwindled almost to nothing in 50 years."

"The only thing we can do" declared the noted naturalist "is to plant more trees to conserve the moisture."

### Art Of Fan Making

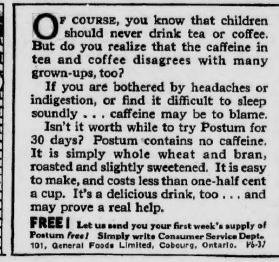

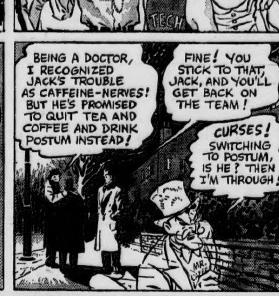

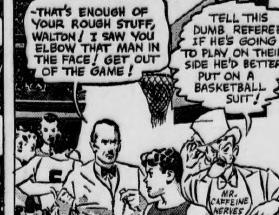

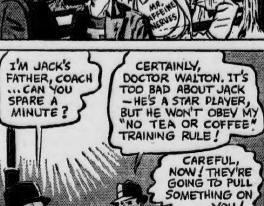

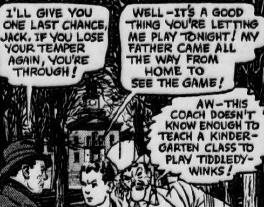

#### Was Known In China Many Thousands Of Years Ago

Fans made of peacock's feathers were used in China in 3000 B.C., and there is one in the Cairo Museum 4,000 years old. The invention was brought from China to Europe by Portuguese traders in the seventeenth century, and Paris was long the centre of fan-making. In 1685 King Louis XIV, expelled all his Protestant subjects and some of them brought the art over to England. The Fansmakers' Company of London dates from 1709.

Atop Luzon mountain, Philippine Islands, are hundreds of bodies of Igorots, clothed and sitting in groups resembling "picnic" parties that have been there for years and have been perfectly mummified by the hot, dry air.

## THE GLEICHEN CALL, GLEICHEN, ALBERTA

### DAD GIVES A GOOD TIP

### British Yacht Challenger

#### Sopwith To Bring Two Yachts To Contest America's Cup

Endeavour II, T. O. M. Sopwith's challenger for the America's cup, will leave Gosport for New York early in May, the New York Times reports. Sopwith will be accompanied by Endeavour II, the old challenger, against whom she will race before the Canadian Society of Forest Engineers.

It is still possible that Endeavour I may represent Great Britain in the series as according to the Times, Sopwith is uncertain which of the two boats is superior. A combination of bad weather and racing mishaps to Endeavour II last summer prevented effective comparison. The rules of the competition require only that the challenging boat be announced not less than 30 days before the match.

Neither boat will race in England before leaving. Mr. Sopwith said he hoped the trial race would be held six weeks of racing on this side before the cup series begins July 31.

The cost of sending out Endeavour II as a trial boat is being borne by a syndicate of British yachtsmen.

### Smallest Steam Engine

#### Less Than Half An Inch High And Perfect In Every Detail

What is stated to be the smallest steam engine in the world is now in Capetown. It is less than half an inch high—about the size of a threepenny bit, and is perfect in every detail.

It is the work of J. M. Ewing, of Kenya, who planned to exhibit it at the Empire exhibition. The exhibition authorities, however, would not take the risk of putting it on view as they were afraid it would be pocketed.

Mr. Ewing stated that it is a three-cylinder, double-acting, vertical steam engine. It has a bore of three sixty-fourths of an inch and a stroke of one-sixteenth of an inch. There are about 200 parts in it.

Finland's army flyers had adopted the avastikka as insignia for their planes in 1917, long before Adolf Hitler came along.

According to the Smithsonian Institution there are 300 dialects in the 45 stock Indian languages.

### PATENTS

The RAMSAY CO. LTD., OTTAWA, ONTARIO, CANADA

### Aerial Survey

#### Can Measure Height And Girth Of Trees By Photography

Canada has led the world in developing aerial surveys. In charge of the forestry survey branch, department of mines and resources, told by E. W. St. John, the old challenger, against whom she will race before the cup series begins July 31.

From the aerial photographs tree heights could be determined from the shadows they cast, he said. Tables had to be worked out for location, season and time. A table had also been worked out for diameter breast height.

It is still possible that Endeavour II may represent Great Britain in the series as according to the Times, Sopwith is uncertain which of the two boats is superior. A combination of bad weather and racing mishaps to Endeavour II last summer prevented effective comparison. The rules of the competition require only that the challenging boat be announced not less than 30 days before the match.

While something might be said for stepping up the speed limit to some extent, in view of recent developments in the automobile industry, to abolish it altogether would be to surrender to the demands of the recklessness, the selfish and inconsiderate—Jonker Diamond

Huge Stone Is Cut Into Dozen Small Jewels

What remains of the big Jonker diamond, 12 smaller but more beautiful stones, rest on a black velvet-covered stand in a Fifth Avenue, New York, office.

Harry Winston's job of cutting up the great diamond was over. Behind him lay months of critical study and anxiety, and gone were 350 carats of diamond, vanished into air.

The Jonker diamond weighed 725 carats in the rough. The total weight of the dozen stones is 375 carats—the rest was lost in the cutting and polishing process.

Jacks, ball and rope jumping were games played by the ancient Roman children.

### NERVOUS WOMEN

No need for women or girls to suffer every month from periodic pains, headache, toothaches, etc. In girlhood Dr. Pierce's Favorite Prescription is a gentle balm.

MacTight: "Do ye think I will pull through Doc?"

Dr. MacFee: "Weel, Sandy, if I were you ma would get more than a bottle of medicine this time."

Tea is said to be the world's most popular beverage.

Mr. Earl Johnson of 48 Jackson St., W., Toronto, has a remedy for you in bed. It is a salve which you apply to your feet at night. It consists of a mixture of various herbs and roots, and is applied to the feet. It is a good remedy for you in bed.

All local automobile drivers are warned to secure wind-shield stickers for their cars in order to conform to the new licensing regulations of the provincial government. These stickers will signify that a three month's license has been paid to March 31st, Return 1936 license plates on your car.

A fancy dress ice carnival will take place at 8 o'clock Friday, Feb. 5th. It will conclude with a moomsni dance, hot dogs and coffee. Under the auspices of the W. A. of United Church.

Funeral services for the late T. W. Stowden were held Thursday afternoon at 2.30 p.m. at St. Andrew's Church with Rev. C. W. Wiley officiating. A number of Gleichen old timers attended the service. Messrs. J. Byrd, F. Jones, S. Dixie, W. Service, T. Bates and W. McIver were acted as pall bearers. Interment was made in Evergreen cemetery.

George Cranebeir, a Blackfoot Indian, well known in Gleichen, died Monday morning after a comparatively short illness. George was a man in his 30's, well educated and could talk perfect English.

Wednesday evening of last week Strathmore Red Wings played here. The score was 2-1 in favor of the Gunners. The Gunners showed a decided reversal of form from the previous game at Strathmore when they were soundly trounced.

"Can you imagine anyone going to bed with his shoes on?" "Who does that?" "My horse."

Quite a little excitement is to be found around the curling rink these evenings as the "Doug Young Competition" draws to a close. There are still several rinks in the running, but it is expected by the end of this week the final game will have been played.

The Bassano bonspiel starts tomorrow, and it is expected that a number of Gleichen rinks will make the trip hoping to ring back some of the prizes.

The Gleichen bonspiel is scheduled to get underway next Monday. The curling club is most anxious that those rinks who plan to enter notify Secretary Reid as soon as possible.

The Cluny Curling Club staged their annual bonspiel last week with about 20 rinks entered. Gleichen skins taking rinks were: Dan MacDonald, T. H. Beach and Wm. Schmidt; The Beach rink won second prize; in the Distributors event, being nosed out by Irwin Young rink from Bassano. Young's rink also won first in the Calgary Pover event. MacDonald's rink reached the finals of the Consolation event but owing to the storm Saturday the final game was postponed. Personnel of Gleichen rinks: W. Thorburn, I. Gove, E. Woods, T. Beach skip; C. Evans, G. Sutor, J. Eggle, D. MacLeod, skip; R. Taylor, R. Menard, D. McLeod, W. Schmidt, skip.

## CHRISTIAN SCIENCE

At all Christian Science Churches next Sunday the subject of the Lesson, Sermon will be "Love". The following is one of the Scriptural quotations contained in the Lesson-Sermon: "As one whom his mother comforteth, so will comfort you; and ye shall be comforted in Jerusalem" (Isaiah 66:13). One of the correlative passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy, is as follows (page 517): "Divine Science, we have not as much authority for considering God masculine, as we have for considering Him feminine, for Love imparts the clearest idea of Deity."

## GLEICHEN UNITED CHURCH

Rev. J. N. Wilkinson, Minister.  
Mrs. H. Birch, choir leader.  
Miss Jean Farquharson, pianist.  
11 a.m. Church School.

7:30 p.m. Devotional Worship. Subject: "Making the Neighborhood Christian."

It is perfectly clear that Jesus meant all His followers to co-operate with Him in the task of building on the earth a kingdom of righteousness, justice, goodwill and fellowship. No one is excused from doing his or her part.

The logical place to start is with ourselves for the "Kingdom of God" is first within, then we reach out to our families, especially the children and teach them to know and love God, then we reach out to the neighborhood.

The sermon on Sunday night will describe Jesus' method of making the

## Good Faith—and a Good Name!

Money—the financial resources of small investors—was loaned Alberta in good faith, and at a time when the province needed help. Shall we break faith with those, our fellow-citizens? Shall we not rather preserve our good name of being "square shooters"? shall we not rather build up than break down the integrity and honesty which are, without doubt, the best policy?

Alberta is a great province, with wonderful natural resources. The development of these resources offers a bright future. This outlook has been hampered by ill-conceived legislation aimed to "soak the rich" but which in reality hurts the best fellows.

A prominent Canadian, who, by the way, is a successful Western farmer, declared that the drastic steps recently taken by the Alberta Government had, quite naturally, destroyed public credit, to a certain extent, private credit; but he felt that the native common sense and judgment of the vast majority of Albertans would assert itself because they know that financial integrity and financial honesty are always the best policy.

*This statement is one of a series written by The Mortgage Loan Association of the Province of Alberta. The Association is composed of 34 member companies. It represents hundreds of thousands of small investments by typical Canadians. Its loans to citizens of Alberta amount to some forty-five million dollars.*

(The sixth statement in this series will be published in two weeks)
